Our institute is proud of...

1. PCPIs (Programs for early professional qualification)

Motivation:

- The program offers the possibility of learning a job while finishing Compulsory Secondary Education
- Most students get their compulsory secondary education certificate
- Most students go on doing vocational training courses

2. Curricular diversification programs

Motivation:

- Students finish their compulsory education at the same school
 - Most students go on studying, either post-compulsory secondary education or vocational training
 - Families are usually quite happy
-

One challenge that we meet is...

To advise/help teachers so that they manage all students to finish their compulsory secondary education

Explanation:

- Many students leave school prior to getting their compulsory secondary education certificate.
- Students can't course vocational training courses if they have not got their compulsory secondary education certificate.
- The type of courses students may do without their compulsory secondary education certificate is very limited
